'De wereld heeft een nieuw besturingssysteem nodig'

Drie oplossingen De coronacrisis is een kans om de maatschappij schokbestendiger te maken, zeggen systeemonderzoekers Alex Pentland (MIT) en Dirk Helbing (TU Delft). Dat betekent: minder top-down, digitaler en lokaler. „Als we deze mogelijkheid niet grijpen, komt er een nog grotere crisis.“

Alex Pentland: „*Bij elke grote crisis moet de relatie tussen individuen, bedrijven en overheden opnieuw uitgevonden worden, of er nou sprake is van een oorlog, een pandemie of een technologische revolutie.*“

Digital Transformation

Disruptive Technologies: (big) data & artificial intelligence

“Hoe zorgen we ervoor dat we relevant blijven, gegeven de missie/opdracht die we hebben?”

Organization & Profession

KEY MESSAGE

*Don't be naive:
grab the opportunities that data & artificial intelligence offer,
in a responsible manner.*

(Context: kick-off opleidingsprogramma 'datagedreven werken' provincie Noord-Holland presentatie Paul Strijp (adviseur nieuwe technologie en data/organisatiestrategie))

1. *What has changed?*
2. *Why are these changes important?*
3. *How can we answer the digital challenges we are facing? (Stay heroes...)*

4. Inspire.
5. Ask the right questions!

Machine Learning:

ML is part of what system requires to become AI.

ML enables AI to perform:

- Detect patterns in all sort of data sources.
- Adapt to new circumstances that the original developer did not envision.
- Create new behaviors based on the recognized patterns.
- Make decisions based on the success or failure of these behaviors.

Why important for organizations?

Kleding met AI

Wetenschappers van MIT hebben garen ontwikkeld dat digitale informatie via minusculle sensoren en geheugenchips kan verzamelen en doorgeven. Zo kan met AI fysieke inspanning worden gekoppeld aan lichaamstemperatuur. Na training van de computer met data kan deze met een nauwkeurigheid van 96% bepalen wat de persoon in slim textiel fysiek aan het doen was. scitechdaily.com

Joining forces for traffic safety

Mercedes-Benz & Ministry of Infrastructure and Water Management, Netherlands

Mercedes-Benz wins landmark road monitoring programme in the Netherlands

Mar 29, 2022 | Stuttgart / The Hague

Mercedes-Benz vehicle data and advanced software tools push efficiency and safety to a next level with large-scale digital infrastructure agreement

Stuttgart / The Hague. Mercedes-Benz has been awarded a far-reaching contract for road monitoring through vehicle data by the Netherlands' Ministry of Infrastructure and Water Management (Min I&W). The project spans two years and covers three key areas: Winter

A close-up view of a circular traffic light or signal unit. The main display area is red and features the word "WACHT" (Wait) in yellow, illuminated dot-matrix letters. Above the main display, there is a ring of small white lights. Below the main display, there are several smaller, dimly lit sections of the matrix. A small gold-colored button is located on the left side of the unit. At the bottom right, a teal-colored rectangular sticker with the word "SIEMENS" in white capital letters identifies the manufacturer.

JOURNEY

What must be taken out of our head and left behind?

“What are we going to do with the ‘new thing’,

must be changed in:

“How are we going to change the old idea”!

Uitdagingen en Risico's:

- Data Privacy en Ethisiek: Grote Dilemma's!
- Data Obsessie ("the dictatorship of data")
- Datakwaliteit: nieuwe paradigma's?
- Skills: Data Scientists
- Energie
- Cyber Security

Valt er nog iets te kiezen

Zeker!

“TAKEAWAYS”

1) Exploitation versus Exploration: Ambidexterity

IMPROVE

- NEW Data
- New Insights
- New Actions

“Exploitation”

INNOVATE

- ‘Data Monetization’
- Digital Transformation

“Exploration”

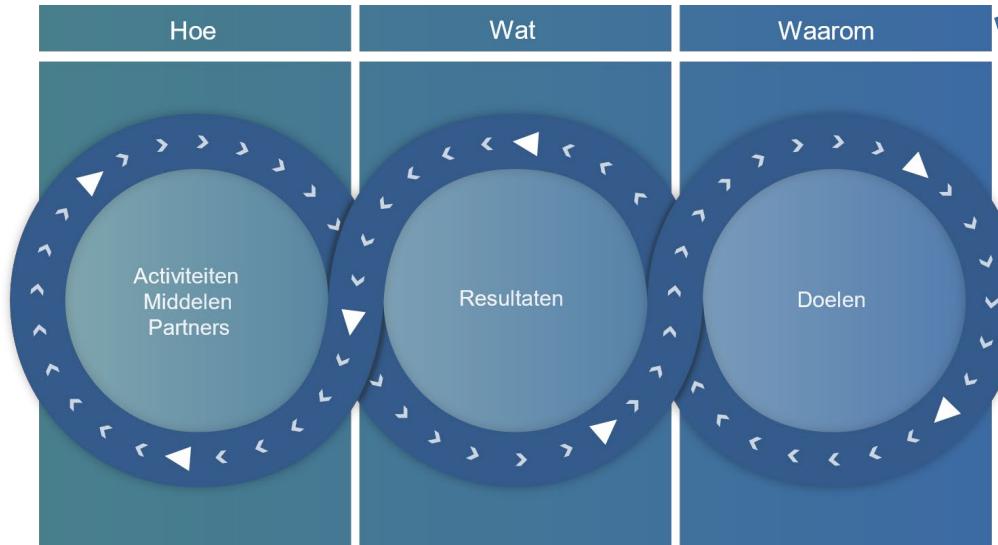

“TAKEAWAYS”

- 2) Get beyond the business case: dare to experiment.**
- 3) Think in ecosystems: no organization can do it alone.**
- 4) Develop joint story about data & analytics.**

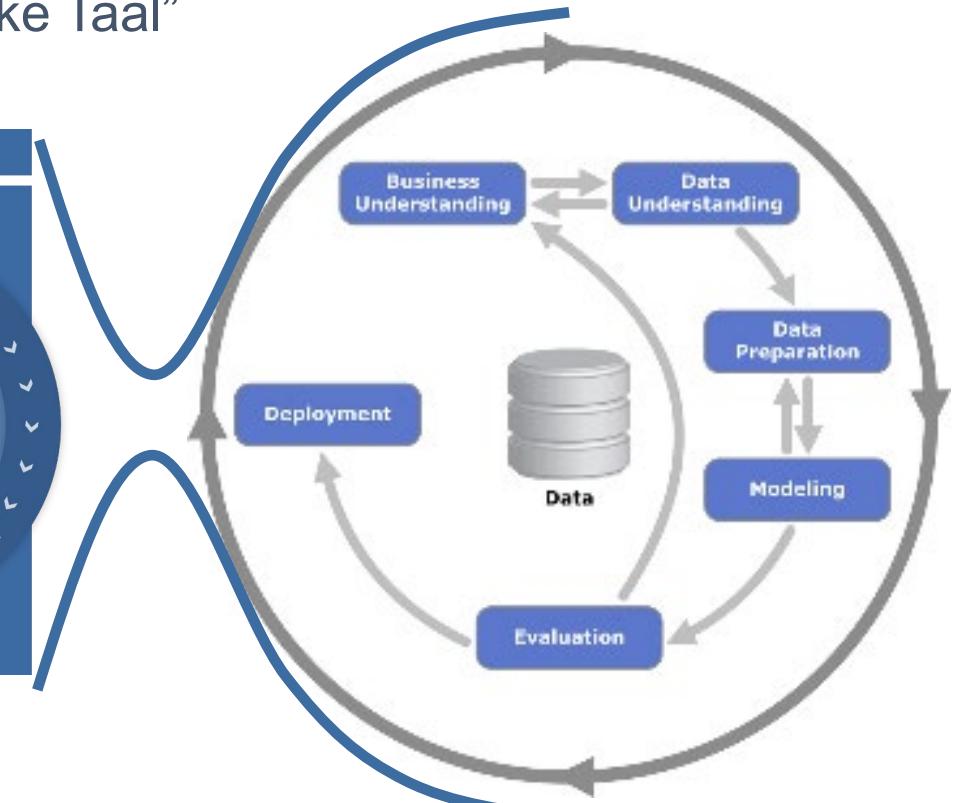

Ervaring: twee belangrijke oorzaken voor de tegenvallende resultaten:

- 1) Projecten worden gestart vanuit een heilig geloof dat data altijd een belangrijke bron van waarde zijn, we moeten dus 'iets' met data, zonder goed na te denken over het 'waarom', 'wat' en 'hoe'.
- 2) Data projecten zijn per definitie multidisciplinair. Vraagstukken rondom technologie en organisatie komen hier dus samen. Twee werelden, die van 'de techniek' en van 'de organisatie'.
